EXECUTIVE SUMMARY

Forward-thinking program leader with 10+ years of experience delivering complex global initiatives across cloud, SaaS, and enterprise transformation. Skilled at driving operational efficiency, cost reduction, and sustainable outcomes by integrating Lean, Agile, and AI-augmented practices into technical programs. Experienced in scaling digital delivery across regulated industries and now targeting remanufacturing and energy programs where innovation, resilience, and sustainability are critical.

CORE COMPETENCIES

- Technical Program Leadership | Agile & SAFe (RTE, PI Planning, OKRs)
- Remanufacturing Process Improvement | Circular Economy Enablement
- Energy Transition & Cloud/Data Governance | Sustainability Alignment
- AI-Augmented PMO | Risk & Compliance (GRC, Cybersecurity, Cloud)
- Cross-Functional Global Teams | Lean Six Sigma Cost Reduction
- Public Speaking & Education | Thought Leadership in Applied Tech

PROFESSIONAL EXPERIENCE

Sabbatical

Canada | Jan 2024 – Present

- Positioning for roles in RTE, Delivery (AI-Augmented) and Agile Enterprise Strategy
- Delivered workshops/seminars on Agile + AI convergence for project managers and product teams
- Built Notion-based project dashboards using AI-enhanced workflows
- Participated in speaking engagements on AI and change management for PMI, meetups and industry groups
- Authored “How to Build a Line Follower Robot Using Barcode” (Amazon, 2025).

Program Manager – Program Enablement, National PMO (Contract)

Randstad | Sep 2022 – Mar 2023

- Directed 7–10 program analysts to deliver dashboards, risk frameworks, and data-driven reporting.
- Coached hybrid teams transitioning to Agile across cloud modernization portfolios aligned with energy efficiency and governance mandates.
- Impact: Reduced reporting cycles by 50%; improved release alignment by 30%, contributing to operational resilience.

Agile Delivery Lead – Cloud Center of Excellence (Contract)

Randstad @ Sun Life Canada | Jul 2021 – Jun 2022

- Oversaw cloud risk, security, and governance initiatives critical to sustainable infrastructure.
- Championed AI-driven taxonomy auto-tagging system to enhance metadata classification of assets.
- Impact: Improved classification accuracy by 40%; reduced audit preparation cycles by 25%.

Nasim Choroumi, MSc PM, SAFe SA, GCP, CRM, SFC, LSS GB

Senior Technical Program Manager – Remanufacturing & Energy

Software Project Manager – Banking Services

NCR Corporation | Apr 2017 – Nov 2020

- Led delivery of cross-country enterprise software bundles (teams of 15–20 engineers).
- Spearheaded process automation pilots and global hackathons tied to product lifecycle optimization.
- Transitioned legacy teams into Agile, accelerating release cycles by 20%.
- Impact: \$3.3M annual revenue contribution; 2x Innovation Awards for applied solutions.

Earlier Roles

Freelance PM & Developer (2016–2017); Project Lead / Application Specialist – RIM/BlackBerry (2009–2015)

- Delivered Lean Six Sigma projects in remanufacturing and reporting automation, saving \$4.8M annually.
- Aligned sustainability-driven efficiency projects with corporate environmental goals.

EDUCATION & CERTIFICATIONS

- MSc, Project Management – Boston University
- BSc, Computing & Information Systems – University of London
- SAFe 6.0 Lead Agilist | Lean Six Sigma GB | Risk Management
- Google Cybersecurity | AWS Cloud Audit | Scrum Fundamentals

AWARDS & LEADERSHIP

- Innovation Disclosure Awards – NCR (2020, 2020)
- Associate Board Member, Agile Innovation Lab – Boston University
- Lecturer – Conestoga College, Global Business & Strategic School (2021–2023)
- Speaker – PMI, Toastmasters, Project Managers United, AI PMO Forums
- Author – How to Build a Line Follower Robot Using Barcode (Amazon, 2025)

STRATEGIC FIT FOR REMANUFACTURING & ENERGY

- Proven record in cost reduction and operational optimization transferable to remanufacturing supply chains.
- Experienced in cloud modernization, governance, and sustainable program design supporting energy transitions.
- Expertise in AI-enhanced workflows aligns with digital twins, predictive maintenance, and circular economy strategies.
